Totalisers

An intuitive differential cell counter that simplifies blood cell counts. When a total of 100 cells are counted, an alarm sounds. The percentage of each type of cell can then be read directly from the window above each key. A simple counter-clockwise rotation of the end knobs will zero all the counts.

- Each key has the name and picture of a particular cell above it, representing groups of leucocytes
 - The key legend strips are easily removed to allow customisation
 - 8 Place set to count Basophils, Eosinophils, Myelophils, Juven., Stab., Seg., Lymphocytes, Monocytes
 - 5 Place set to count Basophils, Eosinophils, Seg., Lymphocytes, Monocytes
- Sturdy solid construction with firm dependable keys

Cat. No.	Description
CO/95010	Totaliser 5 place counting machine
CO/95012	Totaliser 8 place counting machine
