Luminometer, ATP, SystemSURE Plus

Instant reading Bacterial count instrument. 4 easy steps - results in seconds

Swab, Snap, Insert, Read

In conjunction with the Aquasnap™ testing swabs, SystemSURE Plus measures adenosine triphosphate (ATP), the universal energy molecule found in all animal, plant, bacterial, yeast and mold cells. When ATP is brought into contact with Hygiena's unique, liquid luciferase/luciferin reagent in the Aquasnap testing device, light is emitted in direct proportion to the amount of ATP present. SystemSURE Plus measures the amount of light generated and provides information on the level of contamination in just seconds.

- Detects down to 1 femtomole of ATP
- 250 programmable locations per sample plan
- 20 programmable sample plans
- Alphanumeric location ID
- Stores 2000 results
- SURE-Trend analysis software (optional)

Data Analysis Software SURE-Trend, is an easy-to-use result database management software. It allows companies to track results, quickly identify problem areas and generate reports for management or recordkeeping.

- PC/Windows® based software
- Quick querying and trending of results
- Customise reports and charts
- Export data into Excel
- Identifies problem areas for immediate corrective action.

Aquasnap are user-friendly, self contained ATP testing devices used with SystemSURE Plus. Both contain a unique liquid-stable reagent

- All-in-one sampling device & reagent system
- 12-month shelf life
- Unique liquid-stable reagent
- Tolerant to temperature abuse
